

I want it to be known that I am for keeping Indiana's Do Not Call list. I believe it should be our choice whether we want to be hounded and solicited by banks or any other tele-marketer. I personally do not want them calling me. I thought the basis of our government was supposed to be that the states knew what was best for its citizens. The citizens have spoken and now the businesses don't like it. I thought our motto was government for the people. I don't recall government for the banks. Thank you for your time.
